Profile

Full-stack oriented engineer with 8 years of relevant experience (2017-2025) across backend, platform, and production operations. Strong fit for product teams building secure, reliable, and scalable cloud-native services with robust observability and CI/CD practices.

Relevant Hard Skills

- Backend + frontend delivery experience across data-intensive products
- Java/Scala foundation with cross-stack engineering mindset
- Databases, data modeling, query optimization, distributed-system debugging
- Cloud-native deployments with Docker/Kubernetes and CI/CD
- Testing practices: unit, integration, and end-to-end quality gates
- Observability and incident response using logs, metrics, and traces
- AI-assisted development tooling adoption without compromising quality

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned platform delivery and reliability improvements, increasing production stability and engineering throughput.
 - Drove cross-team collaboration and mentored engineers while staying hands-on in architecture and code quality.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built production-grade backend and data services with cloud and automation focus.
 - Improved latency, observability, and maintainability in complex systems under active business load.

Vacancy Fit

- Strong fit for Guidewire Full-Stack role: cloud-native mindset, testing discipline, observability-driven operations, and collaborative delivery with product and design partners.
