

Iurii Basov

Target Role: Frontend Developer (Vue.js / React)

Location: Remote | WhatsApp: +84822510931 | Telegram: @novator_24 | Email: basov.yo@gmail.com | LinkedIn: linkedin.com/in/basovi

Professional Summary

My name is Iurii Basov. I am actively considering Data Architect and Tech Lead opportunities, and I am also open to frontend engineering roles where strong product delivery and technical ownership are critical. I have 10+ years in IT, starting as a Java/Scala developer, then moving into ML and platform engineering, and later leading technical initiatives in enterprise environments. I work as a playing coach and full-stack specialist, combining hands-on coding with architecture thinking and team mentoring.

Core Technology Stack (Matched to Vacancy)

- JavaScript (ES6+)
- Vue.js (advanced production usage)
- React (production experience)
- Frontend architecture for scalable web applications
- Reusable UI components and front-end libraries
- Responsive Web Design
- CSS / SCSS
- Cross-browser compatibility optimization
- Performance optimization for frontend applications
- API integration with backend services
- Webpack and modern frontend build tooling
- Git version control
- Code review and engineering best practices
- Mentoring and team collaboration with UI/UX designers

Relevant Experience

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025)
 - Led cross-functional engineering delivery with strong focus on product quality, maintainability, and collaboration.
 - Supported engineering standards, mentoring, and delivery workflows across frontend/backend collaboration boundaries.

- Software Developer / Lead MLOps & Data Engineer — Multi-domain Projects (Apr 2013 - Aug 2025)
 - Delivered scalable product features across data and web systems, emphasizing reliability, usability, and clean architecture.
 - Worked closely with product and design stakeholders to translate requirements into production-ready solutions.

Working Style

- Strong collaboration with UI/UX and backend teams to deliver cohesive user experiences.
- Focus on clean code, reusable components, and measurable frontend performance.
- Comfortable in contract-style and fast-iteration delivery setups.

Education

Moscow State University — MS, Calculus Mathematics (2001 - 2006)
