Professional Summary

My name is Iurii Basov. I am actively considering opportunities for Data Architect and Tech Lead roles, and I am open to AI product engineering tracks with end-to-end ownership. I have 10+ years in IT: I started as a Java/Scala developer, then moved into ML and platform engineering, and later progressed to leadership roles in enterprise environments. I work as a playing coach and full-stack data specialist, combining product thinking, hands-on implementation, and architecture leadership.

Core Technology Stack (Matched to Vacancy)

- End-to-end product ownership across full SDLC
- TypeScript / modern JavaScript
- Vue.js (preferred framework)
- Python backend development
- AI-enabled product and platform engineering
- AI agents integration into product workflows
- API design and integration
- PostgreSQL and relational database design
- Cloud systems (AWS) and resilient architecture
- Scalability, security, and observability decisions
- Clean architecture and engineering standards
- Testing strategy and quality gates
- CI/CD and automation-first development
- AI-assisted development (Copilot/Claude) with secure practices
- Cross-functional collaboration with stakeholders and users

Relevant Experience

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025)
 - Led AI/platform initiatives end-to-end, from requirement shaping to production rollout and continuous improvements.

- Improved engineering effectiveness, product reliability, and delivery quality through architecture and DevEx-focused practices.
- Software Developer / Lead MLOps & Data Engineer — Multi-domain Projects (Apr 2013 - Aug 2025)
 - Built scalable backend/data solutions and user-facing integrations for finance, logistics, and digital products.
 - Integrated AI-enabled workflows and automation patterns with measurable product and operational impact.

Working Style

- End-to-end ownership from discovery and architecture to deployment and iteration.
- Strong collaboration with users, product stakeholders, and AI/engineering teams.
- Focus on resilient systems, clean architecture, and responsible AI-assisted development.

Education

Moscow State University — MS, Calculus Mathematics (2001 - 2006)
