

Welcome / Intro Message

Hello and thank you for your time,

My name is Iurii Basov. I am currently exploring opportunities in Data Architecture, Tech Leadership, and AI-enabled Product Engineering.

I bring 10+ years of software engineering experience, including hands-on development, architecture design, and technical leadership in high-impact environments.

I work as a playing coach: I stay close to implementation while helping teams deliver reliable, scalable, and business-oriented solutions.

I would be glad to connect and discuss where my background can add value to your team.

Best regards,

Iurii Basov
