Profile

Senior ML systems/backend engineer with 8 years of relevant experience (2017-2025) building production-grade data and AI infrastructure.)Strong fit for roles requiring distributed media/ML pipelines, model-serving optimization, vector retrieval workflows, and reliability-focused operations.

Relevant Hard Skills

- Backend + distributed systems for high-throughput AI workloads
- Async processing and fault-tolerant orchestration patterns
- Multimodal pipeline integration (OCR/STT/embeddings/retrieval)
- Vector search and semantic indexing for media discovery/use cases
- Cloud-native observability and incident-response engineering
- Python/Node.js services with SQL/NoSQL data architecture

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned architecture and delivery of critical AI/data platform modules with strict performance and quality requirements.
 - Drove production-readiness practices for monitoring, reliability, and continuous optimization.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Implemented resilient backend/data services for large-scale multi-source systems.
 - Improved throughput, stability, and operational maintainability through engineering refactoring and workflow hardening.

Vacancy Fit

- Strong match for Tether ML Systems role: production backend depth, AI/ML workflow orchestration, multimodal integration, and reliability-at-scale mindset.
