LinkedIn CV (Filtered to 8 Years Relevant Experience)

Target Role: Senior Java Engineer / Backend Tech Lead

Contact: WhatsApp +84822510931 | Telegram: @novator_24 | Email: basov.yo@gmail.com

Profile

Backend and data-platform engineer with 8 years of focused experience (2017-2025) across Java-centric architecture, high-load data systems, and team leadership. Strong fit for growth and platform environments requiring scalable backend design, incident ownership, and cross-functional execution.

Relevant Technology Focus

Java, Spring, REST APIs, Web Services

Event-driven systems (Kafka), multithreaded backend patterns

JVM/SQL performance tuning, troubleshooting production incidents

System design, microservices, enterprise integration

Airflow, PostgreSQL, Spark, NiFi, Hadoop, S3

Linux, basic React/TypeScript collaboration for full-stack delivery

Experience (8 Years Total)

Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years

Led platform-level engineering and delivery for ML/data products with production-grade reliability requirements.

Coached engineers, improved delivery throughput, and coordinated product/engineering priorities.

Senior Data/Backend Engineer (Consulting Projects) — Upwork (Apr 2017 - Mar 2020) | 3 years

Built streaming and analytics solutions for banking/logistics workloads using Java-adjacent data stack and event-driven integration.

Implemented risk-scoring and real-time processing capabilities; improved latency and operational stability.

Why This Matches the Vacancy

10+ years total IT experience with strong backend foundation, including Java ecosystem, architecture, incident response, and mentoring.

Experience in internet-scale data and platform systems, plus AI/ML exposure requested as a bonus in the role.

Comfortable collaborating with product managers to deliver production features and maintain high code quality.
