

Iurii Basov

Target Role: Sr. Data Scientist (AI & ML)

Location: Open for relocation (Dubai, UAE) | WhatsApp: +84822510931 | Telegram: @novator_24 | Email: basov.yo@gmail.com | LinkedIn: linkedin.com/in/basovi

Professional Summary

My name is Iurii Basov. I am actively considering Data Architect and Tech Lead opportunities, and I am open to Senior Data Scientist (AI/ML) roles in product-centric companies. I have 10+ years in IT, started as a Java/Scala developer, moved into ML/platform engineering, and progressed to leadership of data and AI initiatives. I work as a playing coach and full-stack data specialist, combining problem framing, modeling, experimentation, and production delivery.

Core Technology Stack (Matched to Vacancy)

- Machine Learning and Generative AI systems in production
- Recommendation systems, pattern recognition, data mining
- ML/GenAI frameworks: Scikit-learn, XGBoost, LightGBM, CatBoost, TensorFlow, PyTorch, Keras
- Hugging Face Transformers and LLM fine-tuning
- Excellent SQL and reproducible analysis in Python/R
- Data modeling and dimensional design
- End-to-end data value chain ownership (logging, modeling, analysis, reporting, experimentation)
- Experimentation: A/B tests, multivariate tests, statistical analysis
- Descriptive, exploratory, inferential, causal, and predictive analysis
- KPI design, goal setting, and decision-support analytics
- Data profiling and source-system understanding
- Automated reporting and actionable insight delivery
- Product data analytics: conversion, engagement, retention
- BigQuery / GCP familiarity
- Airflow and data pipeline development

Relevant Experience

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025)
 - Owned end-to-end data and ML initiatives, from business problem framing to production implementation and monitoring.

- Improved decision quality through robust data models, experiment discipline, and KPI-aligned analytics.
- Software Developer / Lead MLOps & Data Engineer — Multi-domain Projects (Apr 2013 - Aug 2025)
 - Built scalable pipelines and ML-enabled services for finance, logistics, and digital product workflows.
 - Delivered measurable impact in latency, model quality, and user/business outcomes through iterative optimization.

Working Style

- Strong ownership of the full data lifecycle and measurable business impact.
- Keep-it-simple approach: use the simplest effective methods to maximize value.
- Collaborative partner to product, business, and engineering stakeholders.

Education

Moscow State University — MS, Calculus Mathematics (2001 - 2006)
