

Iurii Basov

Target Role: Full-stack Developer (AI Solutions)

Location: Spain-based employment ready | Open for relocation to Madrid | WhatsApp: +84822510931 | Telegram: @novator_24 | Email: basov.yo@gmail.com | LinkedIn: linkedin.com/in/basovi

Professional Summary

My name is Iurii Basov. I am actively considering Data Architect and Tech Lead opportunities, and I am open to Full-stack Developer roles focused on AI-enabled product delivery. I have 10+ years in IT: I started as a Java/Scala developer, moved into ML/platform engineering, and later led technical initiatives in enterprise environments. I work as a playing coach and full-stack data specialist, combining hands-on implementation with architecture ownership and team enablement.

Core Technology Stack (Matched to Vacancy)

- Full-stack architecture: web and desktop applications
- React + TypeScript frontend development
- next.js application development
- Python backend development (FastAPI, Django, Flask)
- Optional C# backend interoperability
- PostgreSQL and SQL schema/query optimization
- Azure cloud services (App Services, Azure OpenAI, Cosmos DB)
- Docker containerized services
- CI/CD with Azure Pipelines (Build/Test/Release pipelines)
- Linux environments, scripting, troubleshooting
- Jira/Atlassian Agile sprint workflows
- Authentication and callback flows
- System design documentation and architecture diagrams
- Code reviews, mentoring, and engineering standards
- Security-first and compliance-aware engineering
- AI/GenAI integrations: Azure OpenAI, LLM workflows, RAG patterns

Relevant Experience

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025)

- Led cross-functional product/platform initiatives with strong focus on reliability, delivery quality, and design clarity.
- Guided end-to-end implementation from architecture and APIs to production rollout and documentation.
- Software Developer / Lead MLOps & Data Engineer — Multi-domain Projects (Apr 2013 - Aug 2025)
 - Built and maintained full-stack and data-intensive systems across finance, logistics, and digital product domains.
 - Delivered measurable improvements in performance, maintainability, and deployment speed through automation and robust engineering practices.

Working Style

- Strong end-to-end ownership: from ideation and design to deployment and continuous improvement.
- Comfortable mentoring engineers, running code reviews, and driving architecture decisions.
- Focus on secure, compliant, and production-ready AI-enabled solutions.

Education

Moscow State University — MS, Calculus Mathematics (2001 - 2006)
