

cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am interested in the Sr. Data Scientist (AI & ML) role at talabat. I bring 10+ years of software/data experience with a strong focus on turning ambiguous product and business questions into measurable AI/ML outcomes.

My'core hard skills include machine learning and generative AI in production, SQL and reproducible analytics, data modeling, experiment design and analysis, KPI design, and end-to-end data value chain ownership. I am comfortable combining deep analysis with practical delivery, including automated reporting and production-grade decision systems.

I work as a playing coach: I stay hands-on with data and modeling while mentoring peers and improving team tooling and ways of working. I value pragmatic, high-impact solutions and close collaboration with product and business managers.

I would be glad to discuss how my background can help talabat advance intelligent product decisions and AI-driven operations.

Best regards,

Iurii Basov
