

cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am interested in the Full-stack Developer (AI Solutions) position at PSI CRO. I bring 10+ years of engineering experience across backend, frontend, data platforms, and AI-enabled product delivery.

My core hard skills include React/Next.js with TypeScript, Python backend development (FastAPI/Django), PostgreSQL and SQL optimization, Azure cloud services (App Services, OpenAI, Cosmos DB), Docker, and production CI/CD with Azure Pipelines. I am also experienced in system documentation, architecture diagrams, and secure/compliance-aware engineering workflows.

I work as a playing coach: I stay hands-on in implementation while mentoring peers, supporting design decisions, and improving engineering quality through code reviews and clear delivery processes.

I would be glad to discuss how my background can contribute to PSI process-improvement and AI solutions initiatives in a global delivery context.

Best regards,

Iurii Basov
