

cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am interested in the MLOps / ML Engineer (Predictive AI) opportunity in the energy domain. I bring 10+ years of software/data experience, including end-to-end ownership of predictive modeling and production ML platforms in high-impact environments.

My core hard skills include forecasting and time-series modeling, applied statistics and optimization-oriented thinking, advanced Python, production MLOps delivery, and deployment in demanding operational contexts. I am also experienced with Docker/Kubernetes and translating model outputs into actionable business decisions where revenue and real-world operations are directly affected.

I work as a playing coach: I stay hands-on with modeling and platform implementation while helping teams ship reliable AI systems with measurable business value.

I would be glad to discuss how my background can contribute to your predictive AI platform and decision-optimization goals.

Best regards,

Iurii Basov
