Profile

Senior software engineer with 8 years of relevant experience (2017-2025) in enterprise backend/data platforms, production reliability, and large-scale systems. Strong fit for Java/Spring + Oracle-heavy financial systems requiring requirement-to-delivery ownership and platform evolution.

Relevant Hard Skills

- Java + Spring backend architecture and enterprise REST services
- Oracle data modeling and large data repository operations
- XML schema-oriented workflow support and reporting pipelines
- Production incident management, stability, and scalability tuning
- Business requirement translation into technical specifications
- Event-based architecture migration and end-to-end delivery planning

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Led enterprise platform delivery with strong focus on reliability, maintainability, and operational quality.
 - Drove complex technical initiatives from discovery to production under strict quality controls.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Implemented scalable backend/data solutions in finance-adjacent environments.
 - Improved processing performance and system resilience through architecture and workflow refinements.

Vacancy Fit

- Strong match for Interactive Brokers TaxCust: Java/Spring + Oracle foundation, enterprise reporting workflows, incident ownership, and scalable system modernization mindset.
