Profile

Full-stack and AI-enabled product engineer with 8 years of relevant experience (2017-2025) delivering production systems across backend, frontend, and data layers. Strong fit for roles requiring React/TypeScript + Python, cloud-native deployment, CI/CD governance, and clear architecture documentation.

Relevant Hard Skills

- React/TypeScript + Next.js frontend development
- Python backend services (FastAPI/Django/Flask) and API design
- PostgreSQL schema/query optimization and SQL governance
- Azure App Services/OpenAI/Cosmos + Docker containerization
- Azure Pipelines build/test/release workflows in production
- Linux troubleshooting, scripting, and DevOps collaboration
- AI/GenAI integration patterns including LLM and RAG workflows

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned architecture and delivery of product/platform capabilities with high quality and reliability requirements.
 - Improved team throughput and solution quality through structured engineering and review practices.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Implemented production services and integrations in regulated and performance-sensitive environments.
 - Enhanced maintainability and release confidence via testable architecture and pipeline discipline.

Vacancy Fit

- Strong match for PSI CRO AI Solutions role: full-stack breadth, Python+React strength, Azure-first delivery, documentation rigor, and security/compliance-aware engineering.
