Profile

Senior Data/ML engineer with 8 years of relevant experience (2017-2025) building production-grade data platforms and ML systems. Strong fit for AWS-first roles requiring scalable lakehouse architecture, robust ETL/streaming pipelines, model operationalization, and governance-driven delivery.

Relevant Hard Skills

- AWS S3/Glue/Kinesis/Step Functions data platform engineering
- Python + SQL for ETL, transformations, and analytics workflows
- SageMaker model lifecycle and production monitoring
- Bedrock-driven GenAI workflows for intelligent automation
- Lake Formation governance, security, and access controls
- Azure-to-AWS data migration, validation, and reconciliation
- Data quality and documentation standards in enterprise programs

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned architecture and rollout of production AI/data capabilities with strict reliability and compliance requirements.
 - Improved pipeline throughput and model operational quality through disciplined engineering practices.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Implemented scalable enterprise data solutions across multi-source ecosystems with high performance expectations.
 - Enhanced migration, governance, and analytics readiness through robust platform design.

Vacancy Fit

- Strong match for Jobgether partner role: AWS data/ML depth, SageMaker + Bedrock awareness, migration experience, and end-to-end ownership in enterprise-grade environments.
