Profile

Senior backend/AI-platform engineer with 8 years of relevant experience (2017-2025) in production-grade distributed systems.)Strong fit for AI backend roles requiring inference orchestration, robust failure handling, observability, and low-latency API delivery at scale.

Relevant Hard Skills

- Backend architecture for AI inference and multi-step orchestration
- Request lifecycle engineering: routing, caching, batching, streaming
- Reliability patterns for retries, tool calls, and external dependency failures
- Observability and incident debugging for model-driven systems
- Python/Node.js services with SQL/NoSQL backends
- Kubernetes/Docker deployment and production operations

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned AI/data platform delivery with strict reliability and performance goals.
 - Drove architecture evolution and incident response improvements in high-load systems.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Implemented resilient backend/data services for real-world operational workflows.
 - Improved service stability and response quality through iterative production learning.

Vacancy Fit

- Strong match for A1 AI backend role: production orchestration depth, reliability-first engineering, and measurable performance optimization.
