Profile

Senior ML/MLOps engineer with 8 years of relevant experience (2017-2025) delivering predictive models and production ML systems in high-impact environments. Strong fit for roles combining forecasting/time-series, optimization, and real-world operational decision systems.

Relevant Hard Skills

- Predictive modeling: forecasting, time series, applied AI
- Production MLOps lifecycle: deployment, monitoring, reliability
- Python for advanced model and pipeline engineering
- Optimization methods (LP/MILP) for business decision support
- Docker/Kubernetes for scalable ML runtime environments
- Revenue-linked model delivery in critical operational contexts

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned architecture and rollout of ML platform capabilities with strict production and business KPIs.
 - Improved model operational quality and decision velocity through disciplined engineering and monitoring.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built predictive/data systems supporting optimization and forecasting scenarios under real-time constraints.
 - Delivered measurable gains in efficiency, reliability, and financial decision quality.

Vacancy Fit

- Strong match for Hays predictive AI project: production MLOps, mathematical optimization, high-stakes model deployment, and business-linked engineering outcomes.
