Profile

Backend and platform engineer with 8 years of relevant experience (2017-2025), combining scalable service development, event-driven integration, and technical leadership. Strong fit for high-load marketplace systems requiring reliable delivery, cross-functional design, and production ownership.

Relevant Stack

- Go/Java/Python backend development fundamentals
- PostgreSQL, MongoDB, Redis
- RabbitMQ, Kafka, gRPC/REST
- AWS, Kubernetes, Terraform
- Microservices, legacy decomposition, CI/CD, TDD mindset
- Latency and reliability optimization under load

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned platform architecture and delivery quality for ML/data products; coordinated engineering execution across teams.
 - Led reliability and production improvements; mentored engineers and improved technical planning discipline.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built streaming and analytics services for finance/logistics use cases with message-driven and data-platform architectures.
 - Improved throughput and response times, integrated multiple data sources, and supported production-grade operations.

Vacancy Fit (Wheely Marketplace)

- Meets senior backend expectations for scalable services and production responsibility.
- Strong collaboration with product and data stakeholders to turn business goals into technical design.
- Hands-on delivery with leadership experience and system design depth for Senior+ level interviews.
