

Cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am actively considering opportunities for technical leadership and senior backend development. I bring 10+ years of IT experience, starting with Java/Scala and growing into platform engineering and leadership roles, including enterprise-scale initiatives at Sberbank.

My core hard skills include Node.js, NestJS, TypeScript, JavaScript (ES6), REST and WebSockets implementation, MySQL, RabbitMQ, Redis, Git workflows, 3rd-party API integrations, scalable architecture design, troubleshooting of complex technical issues, coding standards governance, and team execution management. I also bring hands-on experience in adjacent fintech-style domains and high-load product environments.

I work as a playing coach: I combine direct coding contribution with architecture ownership, mentoring, and structured delivery planning. I value open communication, feedback culture, and building systems that are fast, stable, and maintainable.

I would be glad to discuss how my background can support your in-house platform development and help deliver business goals with strong engineering quality.

Best regards,

Iurii Basov
