Profile

Senior engineer and technical lead with 8 years of relevant experience (2017-2025) in scalable backend and platform systems. Strong fit for Node.js leadership roles requiring hands-on coding, architecture ownership, stakeholder communication, and predictable delivery under business pressure.

Relevant Hard Skills

- Node.js/NestJS architecture mindset and TypeScript-first backend development
- REST and WebSockets for high-traffic service integration
- MySQL, Redis, RabbitMQ and event-driven system patterns
- Git workflows, coding standards, and team engineering rituals
- Technical leadership: planning, delegation, mentoring, and execution control
- Complex incident diagnosis and performance/scalability improvements

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned cross-functional technical delivery and architectural direction for high-impact systems.
 - Drove engineering standards, team productivity, and production reliability improvements.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built and supported backend/data services with integration-heavy and performance-sensitive workloads.
 - Delivered measurable improvements in response time, stability, and operational supportability.

Vacancy Fit

- Strong match for BrainRocket Senior Node.js role: leadership + hands-on execution, architecture ownership, integration experience, and scalable platform thinking.
