

Iurii Basov

Target Role: Senior Backend Engineer / Staff Backend Engineer

Location: Open for relocation (Singapore) | WhatsApp: +84822510931 | Telegram: @novator_24 | Email: basov.yo@gmail.com | LinkedIn: linkedin.com/in/basovi

Professional Summary

My name is Iurii Basov. I am actively considering opportunities for Data Architect and Tech Lead roles, and I am open to Senior/Staff backend engineering tracks. I have 10+ years in IT: I started as a Java/Scala developer, moved into ML and platform engineering, and later progressed to technical leadership in enterprise environments. I work as a playing coach and full-stack data specialist, combining hands-on implementation with architecture ownership and delivery leadership.

Core Technology Stack (Matched to Vacancy)

- TypeScript (strong backend focus)
- Backend API design and development
- Distributed systems architecture
- Transaction routing and settlement infrastructure
- Payment infrastructure and asset flow services
- Scalability, reliability, and security engineering
- System architecture and design reviews
- Incident response and production troubleshooting
- Clean, tested code and engineering best practices
- Databases for high-throughput backend workloads
- Fintech / payments / consumer-scale backend mindset
- Startup execution style and fast iteration
- Blockchain domain exposure (bonus)
- Technical ownership in low-latency systems

Relevant Experience

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025)
 - Led backend/platform initiatives with focus on reliability, architecture quality, and fast delivery in high-impact domains.
 - Drove technical decisions, mentored engineers, and supported production incident response and long-term fixes.

- Software Developer / Lead MLOps & Data Engineer — Multi-domain Projects (Apr 2013 - Aug 2025)
 - Built and operated scalable backend and data systems for finance, e-commerce, and logistics workloads.
 - Improved latency, throughput, and system stability through architecture improvements and disciplined engineering workflows.

Leadership & Working Style

- Player-coach approach: architecture + coding + team enablement.
- Strong in translating business priorities into pragmatic backend roadmaps.
- Comfortable in high-growth, low-bureaucracy teams with strong ownership culture.

Education

Moscow State University — MS, Calculus Mathematics (2001 - 2006)
