Profile

Senior backend/platform engineer with 8 years of relevant experience (2017-2025) in scalable services, production operations, and technical leadership. Strong fit for payment and transaction-heavy infrastructure teams requiring distributed-systems thinking, reliability, and speed of execution.

Relevant Hard Skills

- TypeScript-oriented backend architecture and API-first service design
- Distributed systems, low-latency processing, and reliability engineering
- Payment-style workflows: routing, settlement, and transaction integrity mindset
- Production incident triage, debugging, and permanent remediation
- System design reviews, technical ownership, and architecture evolution
- Startup-style collaboration and fast delivery with high engineering standards

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned platform architecture and delivery outcomes; improved reliability and team execution quality.
 - Led technical planning and cross-functional coordination in high-pressure environments.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built backend and data services for finance/logistics scenarios with strict performance and availability targets.
 - Delivered measurable gains in response times, stability, and operational maintainability.

Vacancy Fit

- Strong match for Axiom Recruit backend role: TypeScript-leaning backend focus, distributed systems mindset, incident ownership, and product-building attitude in fast-moving teams.
