

Iurii Basov

Target Role: Senior AI Engineer (Search / Retrieval)

Location: Open for relocation (Singapore) | WhatsApp: +84822510931 | Telegram: @novator_24 | Email: basov.yo@gmail.com | LinkedIn: linkedin.com/in/basovi

Professional Summary

My name is Iurii Basov. I am actively considering Data Architect and Tech Lead opportunities, and I am open to Senior AI Engineer roles focused on search/retrieval. I have 10+ years in IT: I started as a Java/Scala developer, then moved into ML and platform engineering, and later led complex platform initiatives in enterprise environments. I work as a playing coach and full-stack data specialist, combining hands-on engineering with architecture ownership and measurable delivery outcomes.

Core Technology Stack (Matched to Vacancy)

- Python / Go / Java backend proficiency
- Enterprise retrieval systems (search / recommendation / knowledge-base)
- Information Retrieval fundamentals: TF-IDF, BM25, learning-to-rank, query parsing
- Search engines: OpenSearch / Elasticsearch / Solr / Vespa
- Vector search and embeddings: FAISS, pgvector, Pinecone, Weaviate, Qdrant, Milvus
- RAG pipelines and semantic search in production
- NLP/LLM tooling: transformer embeddings, cross-encoder rerankers, prompt engineering
- Frameworks: LangChain, LlamaIndex, Haystack
- Hybrid retrieval pipelines: lexical + dense + SQL/graph retrieval
- Evaluation harnesses: NDCG, MRR, recall@k, faithfulness, citation accuracy
- Permission-aware retrieval and ACL preservation
- SaaS API integrations (REST/GraphQL/webhooks), OAuth, rate limits, incremental sync
- SQL + NoSQL/document stores, distributed systems
- Cloud platforms, containerization, CI/CD
- Knowledge graphs, entity resolution, cross-source identity linking
- Streaming ingestion: Kafka/Flink/Spark

Relevant Experience

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025)
 - Led data and AI platform initiatives requiring scalable retrieval, low-latency access patterns, and production-grade reliability.

- Improved architecture quality and experimentation discipline for ranking, relevance, and operational observability.
- Software Developer / Lead MLOps & Data Engineer — Multi-domain Projects (Apr 2013 - Aug 2025)
 - Built and integrated enterprise data systems across heterogeneous sources, with strong focus on API integrations and governance.
 - Shipped cloud-native pipelines with measurable gains in freshness, reliability, and cost/performance balance.

Working Style

- Quality-obsessed and metrics-driven: prioritize measurable retrieval quality over subjective impressions.
- Self-directed execution from ambiguous problem to production system.
- Collaborative across ML, product, platform, and security teams.

Education

Moscow State University — MS, Calculus Mathematics (2001 - 2006)
