

cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am interested in the Senior AI Engineer (Search / Retrieval) role at Workato. I bring 10+ years of engineering experience across backend, data, and AI-enabled platforms, with strong ownership from architecture through production operations.

My'core hard skills include IR fundamentals (BM25, query parsing, relevance evaluation), vector retrieval and embeddings, production RAG pipelines, SaaS API integration patterns, ACL-preserving retrieval, and cloud-native distributed system delivery. I am comfortable working across heterogeneous content and permission models while keeping strict focus on latency, freshness, recall, and cost.

I work as a playing coach: I remain hands-on in implementation while mentoring teammates and raising architecture and evaluation standards. I prioritize measurable outcomes, robust engineering craft, and cross-functional collaboration.

I would be glad to discuss how my background can contribute to Workato's enterprise retrieval layer and agentic AI platform goals.

Best regards,

Iurii Basov
