Profile

SRE/Platform-focused engineer with 8 years of relevant experience (2017-2025) in cloud infrastructure, automation, and production reliability. Strong fit for roles requiring incident ownership, observability, infrastructure-as-code, and resilient distributed systems.

Relevant Hard Skills

- AWS + Kubernetes production operations
- Infrastructure automation with Terraform/Ansible/Bash/Python
- Observability stack: Grafana, Prometheus, Sentry, Loki
- CI/CD pipelines with Jenkins and GitHub Actions
- RabbitMQ/Kafka-style messaging operations and SQL/NoSQL administration
- Linux troubleshooting, networking, and file-system diagnostics
- Incident response, root-cause analysis, and resilience improvements

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned platform reliability roadmap and drove operational excellence for critical services.
 - Improved production stability through automation, monitoring, and cross-team incident routines.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built and supported cloud-based data/backend services with strong availability and performance requirements.
 - Reduced operational overhead via automation and improved deployment/process consistency.

Vacancy Fit

- Strong match for Wheely SRE role: hands-on cloud reliability, incident response, IaC automation, observability, and engineering collaboration in high-growth environments.
