

Cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am interested in the Senior Software Engineer position. I bring 10+ years of engineering experience, from software development to platform leadership, with consistent ownership of delivery, architecture, and product impact.

My core hard skills include scalable system design, backend/API development, database modelling, software quality practices, automated testing, CI/CD collaboration, and performance optimization. I am comfortable driving end-to-end delivery and working closely with stakeholders to turn requirements into robust production solutions.

I work as a playing coach: I stay hands-on in implementation while mentoring engineers and strengthening engineering standards. I focus on building maintainable systems that deliver measurable business outcomes.

I would be glad to discuss how my background can contribute to your engineering team.

Best regards,

Iurii Basov
