---

Hello,

My name is Iurii Basov. I am a Senior Engineer / Tech Lead with 10+ years of IT experience and I am interested in discussing relevant backend and technical leadership opportunities. I started as a Java/Scala developer, then moved into ML and platform engineering, and later led platform initiatives in enterprise environments.

My core strengths include hands-on development, scalable architecture design, API integrations, production troubleshooting, and team mentoring. I usually work as a playing coach: I stay close to code while driving technical decisions and delivery outcomes.

If my profile is relevant, I would be glad to share my CV and discuss how I can contribute to your team.

Best regards,

Iurii Basov
