

Cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am actively considering opportunities for data architecture, technical leadership, and AI/Python engineering roles. I bring 10+ years of IT experience, starting as a Java/Scala developer and evolving into ML, platform engineering, and leadership roles, including ML platform direction at Sberbank.

My core hard skills include: Python, pytest, agentic AI systems, multi-agent workflows, LangChain, LangGraph, LLM orchestration, prompt engineering, A2A orchestration, Git, GitLab CI/CD, Azure cloud services, Kubernetes, cloud-native application delivery, unit testing, and solution design. I also have hands-on exposure to Java Spring Boot, React, and financial-domain data workflows.

I work as a playing coach and full-stack data specialist: I stay hands-on in implementation while mentoring teams and aligning technical decisions with business impact. I value team atmosphere, ownership culture, and thoughtful collaboration.

I would be glad to discuss how my background can support your AI/Python initiatives and help deliver scalable, production-grade solutions.

Best regards,

Iurii Basov
