

Cover Letter

Dear Hiring Team,

My name is Iurii Basov, and I am actively considering opportunities for data architecture, technical leadership, and senior backend engineering roles. I bring 10+ years of IT experience, starting as a Java/Scala developer and later expanding into ML and platform engineering, including leadership responsibilities at Sberbank.

My core hard skills include Java 17/21, backend development, microservices, mobile API design, TDD, DDD, CI/CD, GCP, Kubernetes, PostgreSQL, Redis, Flyway, jOOQ, Spock, and observability with Grafana, Prometheus, and New Relic. I also have domain exposure to risk-sensitive systems, analytics workflows, and finance-related data.

I work as a playing coach: I remain hands-on in implementation while mentoring engineers and translating business goals into scalable, reliable technical solutions. I am comfortable in fast-paced product teams where execution quality and speed both matter.

I would be glad to discuss how my background can contribute to building robust backend systems and delivering meaningful product impact.

Best regards,

Iurii Basov
