Profile

AI/Python and platform engineer with 8 years of relevant experience (2017-2025). I build scalable backend and AI-enabled workflows, design production-ready solutions, and collaborate with product and engineering teams to deliver measurable outcomes.

Relevant Hard Skills

- Python, pytest, Git, GitLab CI/CD
- Agentic AI workflows, LangChain, LangGraph, prompt engineering
- A2A orchestration patterns and LLM-enabled service integration
- Azure and Kubernetes for cloud-native deployment
- System design and translation of business requirements into technical architecture
- Java Spring Boot and React collaboration experience

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Owned platform delivery for ML/data services and improved reliability, maintainability, and engineering throughput.
 - Led engineers as a player-coach and coordinated cross-functional implementation plans.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Built production pipelines and backend services for data-driven products with strong quality and operational focus.
 - Implemented AI-adjacent workflows and integrated multi-source data flows for analytical and business use cases.

Vacancy Fit

- Strong match for EPAM AI/Python role: Python engineering, AI workflow orchestration, CI/CD collaboration, and cloud-native delivery on Azure/Kubernetes.
