Profile

Backend engineer with 8 years of relevant experience (2017-2025) in scalable service development, data-heavy systems, and technical leadership. Strong fit for Java backend roles in product companies with high-load architecture, CI/CD culture, and measurable business impact.

Relevant Hard Skills

- Java backend engineering, microservices, API development
- TDD, DDD, CI/CD, clean and maintainable code practices
- GCP, Kubernetes, PostgreSQL, Redis
- Flyway, jOOQ, Spock, observability (Grafana/Prometheus/New Relic)
- Risk/fraud/payment-related system experience in data-intensive domains
- Scala background and product-oriented delivery

Experience (8 Years Total)

- Lead Software Engineer / ML Platform Lead — Sberbank (Apr 2020 - Mar 2025) | 5 years
 - Led platform delivery and reliability programs; improved engineering throughput and operational quality.
 - Managed cross-functional execution and coached engineers while remaining hands-on in technical decisions.
- Senior Data/Backend Engineer — Consulting Projects (Apr 2017 - Mar 2020) | 3 years
 - Developed production-grade backend and data services for finance/logistics use cases with strong non-functional requirements.
 - Delivered improvements in latency, stability, and scalability in high-load environments.

Vacancy Fit

- Strong match for Revolut backend role: Java-centric engineering, scalable services, CI/CD mindset, and experience in data- and risk-sensitive systems.
